DETAILED ACTION

Summary

On October 26, 2006, an Office Action was sent to the Applicant rejecting claims 1-20. On January 26, 2007, the Applicant responded by amending claims 1, 4-9, 13-17, and 20.

Claim Rejections - 35 USC § 112

The rejections set forth in the previous Office Action have been withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over LeLeu (6,088,687) in view of Uzo (6,938,019).

Leleu discloses the invention substantially as claimed, as set forth in the previous Office Action; however, Leleu does not disclose a debit gateway modifies the payment

token assigned to each data packet receive, so as to reduce the initial value of the payment token, by an amount representing the cost of the operations to be carried out, for said received data packet. Uzo teaches a process and corresponding system for secure electronic payments comprising modification of the value of the payment token (col.4, lines 10-26 and col.9, line 1 to col.10, line 30). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate modification of the value of the token, as taught by Uzo into the invention disclosed by Leleu, for the motivation of ensuring accurate billing.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
